

Social Side of City Life

PERSONALS, MEETINGS, CLUB ACTIVITIES,
WEDDINGS AND SOCIAL EVENTS

AN X in life is the only fortune work is the finding, and it is not to be found in foreign lands made for us. —L. S.

The Y.W.C.A. is having a tea day to-day at the hall for its guest, Brigadier-General Macdonald. Covera was here for the first time. Mrs. G. W. Macdonald, John Philip Sousa, Misses Mary and Helen, Mrs. Mrs. Wroughton, Mr. and Mrs. J. Stark, Mrs. Taylor and Mr. and Mrs. Clark, and the young guests, Dr. and Mrs. Macdonald and Mrs. Bernays.

In the premises was Mrs. Costellian and the Misses Stewart.

Mrs. Joseph Clarke has as her guests Mrs. Chas. Hepburn and Mrs. Hepburn.

J. R. McIninch and Mrs. McIninch and Mrs. McIninch were a party.

Dr. and Mrs. Brattaille guests were Mrs. McQueens and Mrs. Taylor, Mr. and Mrs. Duncan Smith and a party.

Capt. and Mrs. Evans Green and children, Capt. and Mrs. B. C. Thompson occupied a party.

Mr. and Mrs. Robt. McDonald, Mrs. McDonald and Mrs. Conington was a party.

Mrs. Chas. E. P. Duggan, and Mrs. A. M. McQueens and daughter, of Toronto, Misses Kirkpatrick, Miss Nada Stewart.

Mr. and Mrs. MacLennan were Mrs. Haight and Miss Haight of Vancouver.

Mrs. Fred W. Heath, 1241 street, entertained at the tea hour for Mrs. W. H. McIninch, Mrs. McIninch, Mrs. Ruth Matthews, Mrs. Fred Conington.

For the Y.W.C.A. afternoon matinee before the grandstand the boxes were well filled with the young people well filled with Brig.-Gen. Macdonald.

YE OLDE FIRME
Heintzman and Company
Limited

would recommend the following July Records for this week:

Souvenirs, played by Vernon Zimbabwe.

When You're in the Heart of the Rose, sung by John McCormack.

The Young Party, sung by Mabel Hartman.

Out of the East, (Fox Trot), J. C. Smith and Orchestra.

Oh, Canada, (Fox Trot), J. C. Smith and Orchestra.

Eps Trio.

WEDNESDAY, JULY 9, 1919.

More Wheat Not Wanted?

Now that the wheat has been sown, and there can be no possible stimulus to greater production, the government is talking about fixing a price for wheat. What was the objection to increasing the wheat crop?

The Fiddlers.

Parliament has adjourned; on condition that a special session is to be called at the earliest opportunity, the members have agreed to accept an extra sessional indemnity as the price of ignoring the conditions of the country and going home, leaving the profiteers to exploit the disfranchised machinery intact for emergency use.

A Hope.

Perhaps some day when parliament has settled such world important matters as the bestowal of titles upon Canadian citizens, it will find time to legislate the exception of the streets, houses, and roads to the fiddlers. It is to be hoped that this fiddle will be sold to the government for a sum standard of weight or measure. The current practice of selling by the box, with the bottom half way up the box, is simply robbery aggravated by false pretences.

The Money Must Be Raised.

The reduction of the tariff to a revenue-producing basis is the only hope of removing the federal deficit. The amount of a moderate amount, or of preventing its extension to much smaller incomes. The treasury must be supplied with money. If it is not supplied, the government will collect its taxes from people who pay tariff-made prices on manufactured goods. The question is whether the consumer is to pay once or twice.

A Peace Time Substitute.

The censorship of cable messages is supposed to have come to an end. But it is notable that the defeat of the British government in the war of the commonwealth was only made known to readers in this part of the world or our day late in a dispatch announcing that the government had not been defeated in the war of independence. Also that the progress of the war between Italy and Serbia for possession of the Dalmatian littoral is not reported. If the war had been abolished, apparently some substitute has been found that functions in much the same old way.

Government Profiteering.

Very evidently the excess profits of the war in Canada are nothing to check profiteering.

The exploiter, it appears, was allowed to charge up as "business expenses" in one year the amount of the tax he had to pay to the government. Not only did it, and the net effect of the tax was to boost prices by the amount collected.

The government in effect went into partnership with the exploiter, and took a rake-off in the game, and left him to himself from the public. Therefore he profited the more the government's rake-off; and the bigger the government's rake-off one year the higher the prices were present.

The Political Mercer.

The idea so successfully exploited by the interests a couple of years ago, the way to get public money for the war, was to abolish party privilege and select a "good business government"—has been tried out, its results have been tabulated by a parliamentary committee in

investigating the high cost of living. It is to be hoped that the headed people who were taken in by that line of talk are satisfied with the results of their action. That it has been a "good business" government for the interests there is no room to doubt. For the public it has been neither "good business" nor government." A good business government for the public—can only be got through the lively competition of parties.

Shielding Sir Robert.

The manager of a Winnipeg cold storage warehouse told us the cold storage part of the business. Sir Robert Borden holds \$9,500 stock in the concern, and that it has been making profits at the rate of fifty-one per cent. The company, in face of this, has directed every effort to be brought in a report declaring that there is no such thing as profiteering in Canada.

Everyone who is interested, materially or sympathetically, in the development of the live stock market in the province—and everybody should—will rest with satisfaction of the large shipment of frozen beef which last week left the city for Italy.

There is opportunity in Alberta for the raising of cattle, and the amount of beef that can be consumed in the province. For the surplus markets must be found abroad, and the knowledge that the cattle are raised in Alberta is a share of the world trade that we are on the road to lead to expansion of the stock-raising business.

There is a large number of cattle in the province which exist the commerce in Canada is likely to be curious to know how much this beef is likely to cost the Italian family by the time it has crossed the continent and the incendiary costs of preserving and distributing it.

Italy is a great industrial country, where the prevailing wages are the same fraction of the wages received for similar work in Canada. Yet Canadian workers have been forced by stern necessity to cut down their meat consumption, and the same must be a nation of consumers if out of their smaller wages they can pay the higher taxes imposed by the war and still have enough left to buy beef imported from Canada.

The Profiteers' Defence.

The Financial Post thinks the hue and cry about the profiteers is due to an exaggerated idea of what is meant by "profiteering." They have boosted the cost of living, and made calculations to show that the whole profits of the living were wiped out the cost of living would only be reduced to 10 per cent. For a family of five, this is a large sum to be taken out of the pocket of a family of five. This is the reason that the ambers have been divided among themselves in war time more than they did in peace time, one concern admitting profits last year to be 61 per cent. That only a small portion of these profits was taken from each customer is hardly a justification that when that fraction was not properly collected.

Why the dictation of terms to Austria?

The Austrian peace treaty is held up, according to Paris dictation, and it is not clear, nor has been decided how to fill in the blank spaces left for clauses dealing with the Italian claims.

Why the dictation of terms to Austria?

Austria, a polyglot empire that has maintained itself in the world through the power of its military machine, is hacking the Jugoslav and against Italy; on the strength of President Wilson's 14 points.

Austria should try to do something for the Italian people. The Italian government should stand for any such underhand work at Vienna is inexplicable, and anything but hopeful.

Why the dictation of terms to Austria?

With the Humorists.

When Pat Measured Up.

"I'm not a fiddler, Pat," said a man to an Irishman.

"I am a fiddler, sir. The poor hawker said to me, 'I am a fiddler, sir,' answered Pat."

"'A' said the man, "then he died by inches, sir."

"No, sir," said Pat with a wide smile, "I am a fiddler, sir, exactly. He went back of the house, and died by inches, sir."

Humor Stories.

Elaine—My grandpa has coached the 9c. I am not wonderful.

Elaine—Well, I am not wonderful at the time it takes him to do it.

Firms Aid.

Elaine—Is there—what is it?

But let me—what is it?

Most any pretty maiden is apt to be at wits' end.

A Letter to the Editor.

Visitor—What were you accused of? Convicted of—watching a watch. I was accused of being a thief, and sixteen witness came to prove strong speeches to the jury, but all went in vain: I was sentenced to four years.

Visitor—I don't see why you weren't convicted.

Visitor—Well, there was just one weak point, that's all. They found the watch in my pocket.

Visitor—It would be interesting to know how many Canadian farmers were present.

The Fair.

The number of entries show that

the fair is quite up to standard as

an exhibition program on the opening

day was good, though curtailed

on account of the weather. Sonsa's

and alone was worth the price.

The attendance was not up to day

record. It is a fair worth going

to, and with fine weather should

draw larger crowds than any pre-

ceding event of the kind, and will

doubtless do so.

The Difference.

It is no defence for profiteering in Canada to say that there has been profiteering in free trade long enough. Liked there has been. But the time has been shorter. That it has been a "good business" government for the interests there is no room to doubt. For the public it has been neither "good business" nor government." A good business government for the public—can only be got through the lively competition of parties.

Shielding Sir Robert.

The manager of a Winnipeg cold storage warehouse told us the cold storage part of the business. Sir Robert Borden holds \$9,500 stock in the concern, and that it has been making profits at the rate of fifty-one per cent. The company, in face of this, has directed every effort to be brought in a report declaring that there is no such thing as profiteering in Canada.

A Nation of "Wizards."

Everyone who is interested, materially or sympathetically, in the development of the live stock market in the province—and everybody should—will rest with satisfaction of the large shipment of frozen beef which last week left the city for Italy.

There is opportunity in Alberta for the raising of cattle, and the amount of beef that can be consumed in the province. For the surplus markets must be found abroad, and the knowledge that the Italian family by the time it has crossed the continent and the incendiary costs of preserving and distributing it.

Italy is a great industrial country, where the prevailing wages are the same fraction of the wages received for similar work in Canada. Yet Canadian workers have been forced by stern necessity to cut down their meat consumption, and the same must be a nation of consumers if out of their smaller wages they can pay the higher taxes imposed by the war and still have enough left to buy beef imported from Canada.

The Profiteers' Defence.

The Financial Post thinks the hue and cry about the profiteers is due to an exaggerated idea of what is meant by "profiteering." They have boosted the cost of living, and made calculations to show that the whole profits of the living were wiped out the cost of living would only be reduced to 10 per cent. For a family of five, this is a large sum to be taken out of the pocket of a family of five. This is the reason that the ambers have been divided among themselves in war time more than they did in peace time, one concern admitting profits last year to be 61 per cent.

That only a small portion of these profits was taken from each customer is hardly a justification that when that fraction was not properly collected.

Why the dictation of terms to Austria?

The Austrian peace treaty is held up, according to Paris dictation, and it is not clear, nor has been decided how to fill in the blank spaces left for clauses dealing with the Italian claims.

Why the dictation of terms to Austria?

Austria, a polyglot empire that has maintained itself in the world through the power of its military machine, is hacking the Jugoslav and against Italy; on the strength of President Wilson's 14 points.

Austria should try to do something for the Italian people. The Italian government should stand for any such underhand work at Vienna is inexplicable, and anything but hopeful.

Why the dictation of terms to Austria?

With the Humorists.

When Pat Measured Up.

"I'm not a fiddler, Pat," said a man to an Irishman.

"I am a fiddler, sir. The poor hawker said to me, 'I am a fiddler, sir,' answered Pat."

"'A' said the man, "then he died by inches, sir."

"No, sir," said Pat with a wide smile, "I am a fiddler, sir, exactly. He went back of the house, and died by inches, sir."

THE MAPLE SMILE AND CHEER—CANADIANS EN ROUTE HOME

A Century on the Sea

The former Allan Liner *Alsatian*, 18,000 tons, now with the C. P. O. S., and known as the *Empress of France*.

A little over a hundred years ago—on May 24th, 1818—there appeared in "The Glasgow Herald" a "notice to shippers and passengers for Canada" stating that the brig Jean, Alex. Allan, master, would clear from Greenock for Quebec on the 1st of June "and proceed to sea in favourable opportunity thereafter." Then in the "Herald" of June 11th, there appeared the following item of shipping news:—"Sailed last Friday for Quebec, the Brig Jean, Alex. Allan, master, bound for Quebec on the 1st of June, and proceed to sea in favourable opportunity thereafter."

shipping news: "Sailed, June 5th Jean, Allan, Quebec."

These two notices marked the beginning of the Allan Line services between the Clyde and the St. Lawrence. The Allan Line, however, was not established through many intervening years, as it still exists as a part of the Canadian Pacific Ocean Services (Limited). After the initial sailing of the Jean, Captain Alex. Allan obtained more vessels, and inaugurated a regular seasonal service. In due time the fleet of sailing ships was replaced by iron ships, then by iron steamers, and, later still, by steel steamers, but, all through, the con-

intimacy of the service was maintained and the company developed in importance as the Dominion of Canada was opened up and the necessity for large and master ships arose. For many years they carried the Canadian mails, and their services between the Clyde and Liverpool and the St. Lawrence and seashore ports of the United States, the principal links between the United Kingdom and the Dominion.

was small, and this country was almost unknown in the world's market. In 1858 a contract for a weekly service was entered into and the

most unknown in the world's markets. Captain Allan had a successful voyage over to this continent and back to the Old Country on his ship—which weighed only 169 tons. When sailing for Canada again he brought two ships with him, and so the Allan Vice was entered into and the Nova Scotia, Bohemian, Hungarian, all vessels of about 1,000 tons gross, were ordered. The government subsidy at this time was \$204,000 per annum, or about \$100 per round voyage.

Line began its great work of linking Canada and the Maritime in closer union.

It was on May 21, 1824, that Captain Allan, accompanied by his son George, arrived in Glasgow. He had arrived in the brig *Forfarshire* on the second of his ship's, the brig *Forfarshire*. Shortly after his arrival in Glasgow, he settled in Glasgow. There he settled his attention to building other vessels. The ship owners with whom he was associated in this time were the Allan family at this time were the Allans, Caledonia, Cambria, Britannia and Albany. In 1825 he was associated with the Allans when the brig *Java* was built.

Soon after this, money having been raised in the ship owners, Glasgow, the *Montrose*, a 400-ton ship, was built, and the St. George, St. Andrew and the St. Edmund were built in 1826. The *Montrose* was built in Dumbarton. The first three ships were 1,400 tons, and the St. Edmund was 1,600 tons.

In 1826 the Norwegian and the *herringman*, of 2,400 tons and 450 men, was built. In 1832 the *herringman* and the *Montrose* were sold. In 1833 they purchased the *herringman* and the *Montrose* and the *Mermaid* of 2,400 tons and the *herringman* of 2,600 tons.

Hugh Allan was on the *Montrose* when the *herringman* was built.

In 1852, Hugh Allan, in conjunction with his son, John, and his son-in-law, George Brown, founded the Allan Line. The first ship, the *Favorite*, was built at the shipyards of John and George Brown, and was named after the wife of Hugh Allan. The *Favorite* was a 350-ton ship, and the *John Brown* was a 450-ton ship. Both ships were built for the express purpose of carrying passengers and goods between Canada and the United States. The Allan Line soon became one of the most successful shipping lines in the world, and its ships were known for their speed and reliability. The Allan Line continued to operate until 1914, when it was merged with the Canadian Pacific Railway.

ition with William Dow, and a wealthy brewer, Peter Brewster, of Montreal, and the Canadian Steamship Company, formed the Montreal Ocean Steamship Company.

The first iron screw steamer in the Canadian waters were three small steamers, the *Calgary*, *Edmonton*, and *Winnipeg*, about 1,700 tons gross, with a crew of 25, and a capacity of about \$25,000 each.

In 1852 the Canadian Government, in order to develop the country, gave a charter to a Liverpool firm for a fortnightly mail service. This was succeeded, having proved unsatisfactory, and a new contract was let to a Canadian firm, for which the steamer *North America* was built.

In July, 1857, the *Alisan Line* was formed, amalgamated with the Canadian Steamship Company, and began to operate all the coasting vessels.

Range Yesterday Afternoon.

All Set Up in the Kitchen

It's a picture for sore eyes. And
cook! Why, the wife is tickled for a
fair!

I'm just going to invest in a pair of those Royal
Oak Tires they have on display at the Northern
Hardware Company's Booth. The fellow in charge
told me that the tires are made of a special material
when Face to face with facts, knowing that my
pocket-book is my guide. I'm for taking that
little extra trouble to get the best tires, getting
them guaranteed out and getting the Tires \$20.00
at the Special Price of each.....

I save ten dollars on this deal, which will just
about see my wife and myself through the Fair.

FALL RYE

The greatest Grain that can be sown in Alberta. This stands more dry weather and
resists more of the grain than any other grain. It should be sown in July or
as soon as the soil has become warm. It then grows rapidly and produces a
crop that is more abundant and higher quality on account of the broad
leaf being similar to that of wheat. It also produces abundant pasture in the
earliest part of the year. We can supply (1) Fall Rye (2) Winter Rye (3) Winter
Barley. We have a No. (2) grade at a lower price than when sown at 120
per pound.

BLATCHFORD'S CALF MEAL

Also, one of the greatest feed for Calves that has ever been introduced. Try a
small quantity, we will prove for itself, either as a milk substitute with water
or to mix in with milk.

Now Generated. We can supply first-class Feed Oats for Grizedford at \$1.00 per
busel, and Field Peas at \$1.00 per busel.

We INVITE All visitors attending the Edmonton Exhibition to see our display
and to call on us at the Store.

Current Comment

WINNIPEG NEWSPAPER

The war is over. The peace treaty has been signed; and now comes the task of the people to face in hand the problems of reconstruction and rehabilitation. The peace negotiations for peace have left nothing to be desired.

What is true of the war and of the world is true in no less degree of the peace. The war is over, and Winnipeg must set to work to reconstruct and rebuild itself.

There is an element among the employers which is not unwilling that discontent and distrust should continue to prevail among the workers. There is an element among the employers which thrives on the fostering of unrest and discontent among its followers, and which is not unwilling to profit even upon any rapprochement between the workers and the employers to destroy its reason for existence. There is an element among the citizens of Winnipeg which is not unwilling that the result of the strike upon its own welfare should be to bring about a rather reactionary than conciliatory attitude.

These two elements must be satisfied. So long as they exist, so long as the workers are not fully organized in the community, there is every prospect of further trouble. It is to be expected that before another winter is upon us we shall be in the position of having to face a strike, which may well prove more severe and more disastrous than the one which has just been brought to a close. But it is well to remember, it is essential to realize that the misleading of the workers by the employers and their revolutionary leaders could not have been so easily and so deeply rooted and justified, had the workers been fully aware that they were being treated unfairly.

These grievances must be removed. These wrongs must be set right. The workers must be given the work that their punishment fits the crime. The employers must be given the rest. It still exists; and it leaves a bad taste in the mouth of the workers. It must be removed. But they have not yet found the way to do it. There has been no real foundation for the strike, and the workers have not yet found the way to do it.

These grievances must be removed. These wrongs must be set right. The workers must be given the work that their punishment fits the crime. The employers must be given the rest. It still exists; and it leaves a bad taste in the mouth of the workers. It must be removed. But they have not yet found the way to do it.

These grievances must be removed. These wrongs must be set right. The workers must be given the work that their punishment fits the crime. The employers must be given the rest. It still exists; and it leaves a bad taste in the mouth of the workers. It must be removed. But they have not yet found the way to do it.

SUCCESSION OF THE WEAK

Turner's Weekly, Saturday.

THE CANADIAN GOVERNMENT has issued a call to the Canadian Industries to keep alive and to increase the output of war materials.

AN INSPECTION must necessarily mean money. It would seem that the Canadian Industries are not yet in a position to meet the call.

Eastern Newspaper Tells of Phone System of Edmonton

(Toronto Telegram) EDMONTON, July 9.—(Special)—The Telegram's investigation of the workings of automatic telephone systems in Canada has elicited curiosity as to whether such a system could be applied to a big city.

The answer is a decided "Yes!" And Edmonton's experience backs up that answer. The city's telephone system can utilize the automatic system as well as a town of a hundred persons can do. The cost of the plant is the size of the plant. For every 100,000 lines you need 100,000 square feet of space. It is a simple process, purely mechanical.

John E. Lowry, the man who has put the medium into Edmonton's telephone system, was a surprise without increasing rates. Lowry, 27, is a young man and draws a salary of \$3,000 annually. He is red headed and slender. Under his coat he wears a suit. This was on domestic phones only.

Lost Phones Come Back.

Given the time to come back, this Irish superintendent is a collection of permanent. He has another secret. He gave these one-way phones to his subscribers. When many phone subscribers were under that system paying more than a cent a call, he got a cent a call.

Edmonton has had any experience with the Bell monopoly. In 1906, however, a small private concern humanly named "Edmonton" was organized. It was unsuccessful and in 1908 the automatic system was a success but financially a failure. Just why no student of the situation can tell. The telephone system steadily increased until 1915 there were 10,752 phones in service.

Today the Investment represents \$176,000, and there is a net revenue of \$16,000. The difference is represented by an amount invested in the plant. The cost for 22 years and the interest is six per cent.

Cheap and Efficient.

Business phones cost \$4 and residential phones \$1.50. The "peak" was reached in number of phones used—20,000. Then the company came to an end by November, 1916.

SHE COULD NOT STAND OR WORK

But Lydia E. Pinkham's Vegetable Compound Restored Her Health and Stopped Her Pains.

Portland, Ind.—"I had a dislocated shoulder so badly that if I sat up I could not move my feet at all. I was all run down and I could not do my house work, was nervous and could not sleep at night. I took treatment from Dr. E. Pinkham's Vegetable Compound and my shoulder was set. I tried it and now I am strong and well again. I work and I give thanks to Dr. E. Pinkham's Vegetable Compound, the original Mrs. Josephine Kinsale, 385 West Race Street, Indianapolis.

Thousands of American women give this famous root and herb remedy the credit for health restored as did Mrs. Kinsale.

For helpful suggestions in regard to such conditions, write to Lydia E. Pinkham, M.D., Lynn, Mass. The result of its long experience is at your service.

TRY MAGNESIA FOR STOMACH TROUBLE

It Neutralizes Stomach Acidity. Prevents Food Fermentation, Sour, Gassy Stomach and Acid Indigestion.

Thousands of people suffering from indigestion who have already tried plain pep- per, ginger root, and other known forms of digestive aids, and who know that they are not effective—some even do not even give relief—will find that Magnesia, the ordinary commercial carbonate, effectively relieves their trouble, which you can obtain from Magnesia, the Magnesia tablet, or tablet form.

A good dose of the powder or two compressed tablets with a little water will neutralize the acid and remove the difference this makes. It will instantly relieve the trouble and give the stomach which now carries your food to the intestines a rest. The restorative and invigorating feature of our product was held in the highest esteem by the medical profession.

There is no product that will provide you with a little bisulcated magnesia immediately after a meal, to neutralize the acid and assist in without any danger of pain or distress. The neutralized magnesia contained in the bisulcated magnesia is so easily absorbed that there are no symptoms of acid indigestion.

Use Coconut Oil For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with.

Don't use prepared shampoos or anything else that contains too much alkali. The soap makes the hair brittle, and is very harmful. Just a few drops of coconut oil (which is pure and entirely greaseless) is much better than anything else that can be used. It will not only not possibly injure the hair.

Smear a few drops of the oil with water and rub it in. One or two teaspoonsfuls will make an abundance of lather. It will clean the hair thoroughly. The lather rinses off easily, leaving no particle of dust, dirt, dandruff and ex- cessive water.

You can get nutrefied coconut oil at most drug stores. It is strong enough to clean your hair entirely, but it will not injure the hair.

It can be used to wash the hair with the greatest moderation and

you can get nutrefied coconut oil at most drug stores. It is strong enough to clean your hair entirely, but it will not injure the hair.
